```
#-----------------------------------------------------------------------
# This file contains information on the applications configuration.
# A configuration file consists of text lines (marked by # or !) and lines with
# KEY: VALUE pairs.
# Only insert or replace the values after the ':'! Changing the keys will result
# in malfunctions!
#-----------------------------------------------------------------------
# All english translations of text snippets are stored here.
# All KEYs abbreviate the content in english, look for the original
# messages_de.properties file for translation reference.
#-----------KEYS-----------!=!---------------------VALUES-----------------------
